

**What is claimed:**

a light unit for projecting light in the range of from about 660 nanometers to about 1200 nanometers.

an imaging means for the translation of visible and infrared light reflected from an object into a first electronic signal, and  
transmission means for transmitting said first electronic signal;

1. The first group of people who are interested in the results of the study are the researchers themselves. They want to know how well the study was conducted and whether the results are reliable. They also want to know what the implications of the results are for future research.

2. The second group of people who are interested in the results of the study are the practitioners. They want to know what the results mean for their work and whether they can use the findings to improve their practice.

3. The third group of people who are interested in the results of the study are the policy makers. They want to know what the results mean for the development of policy and whether they can use the findings to inform their decisions.

4. The fourth group of people who are interested in the results of the study are the general public. They want to know what the results mean for them and whether they can use the findings to improve their lives.

5. The fifth group of people who are interested in the results of the study are the funding bodies. They want to know what the results mean for the funding of the study and whether they can use the findings to inform their decisions.

6. The sixth group of people who are interested in the results of the study are the media. They want to know what the results mean for the public and whether they can use the findings to inform their reporting.

7. The seventh group of people who are interested in the results of the study are the academic community. They want to know what the results mean for the field of research and whether they can use the findings to inform their work.

8. The eighth group of people who are interested in the results of the study are the government. They want to know what the results mean for the country and whether they can use the findings to inform their decisions.

9. The ninth group of people who are interested in the results of the study are the industry. They want to know what the results mean for the industry and whether they can use the findings to improve their products or services.

10. The tenth group of people who are interested in the results of the study are the community. They want to know what the results mean for the community and whether they can use the findings to improve their lives.
